How to use the Half Bracelet Glue in Findings...

These versatile findings have a “knob” on one side that you will need to create a loop to go over and this will be your closure.

These work well with Spinsters cords, leather, Viking knit and Kumihimo!

Create a loop at the end of your cord. Test fit it around the knob.

Fix the loop by wrapping it with spare cord or wire. Trim off any extra length.

Test fit your decorated cord around your wrist.

Tie off the end where you want to cut the cord and trim the extra length.

Mix an epoxy glue to hold the end following the manufacturer's directions.

Add a small amount of the Epoxy into the opening of the bracelet finding.

Gently fit the end of the cord into the opening & allow to dry.

Enjoy!
