## Supply List

- Size 11 seed beads – 16 grams
- Size 15 seed beads – 3 grams
- 3mm Swarovski bicones - 180
- Fireline, 6lb
- Size 12 needle

This super simple, super long necklace is something I designed mainly because it was a project I wanted to wear! I hope you'll love it as much as I do.

<https://youtu.be/99WDFIvnBuU>

There's another option for making your Ritzy Ribbon instead of a single long necklace, and that's to turn it into a multi-strand necklace with the three-strand slide clasp included in your kit. The instructions for attaching the necklace strands to the clasp are at the end.

## Step 1

Cut a comfortable length of Fireline (thread) for you to use, and thread your needle.

If you haven't worked with Fireline before, I suggest starting with a wingspan (outstretched arm to outstretched arm.) You will have to flatten the tip of the Fireline to get it threaded on your needle.

Leaving a 6" tail, pick up 4 size 11 seed beads, and pass back through all of them again, then continue to move one more bead past your tail to turn them into a single right-angle weave unit.

## Step 2

Pick up 1 size 11 seed bead, a crystal, and 1 size 11 seed bead. Pass back through the original seed bead you were exiting. Then continue to move forward until you're exiting the crystal.

Because I'm coming across the edge of a crystal with my Fireline, I like to reinforce this path and the one on Step 3 too – crystals are nasty little thread-cutters, so a second pass of thread will help secure it. This is up to you whether you do this extra reinforcement or not.

**Note:** feel free to flip this around as needed. As a right-handed person, I like to bead off to the right, so after Step 1, I flip it over so my working thread is on the right for Step 2.

### Step 3

Pick up 3 size 11 seed beads and then pass back through the original crystal you were exiting. Reinforce this path if desired, as in Step 2. Then work your way forward so you're exiting the seed bead next to the crystal.

### Step 4

Pick up a size 15, a size 11, and a size 15. Pass over the crystal and through the seed bead on the opposite side, plus the next two beads of that RAW unit so you're exiting the bead on the bottom.

Then add that same embellishment on the bottom of the crystal. Pick up a size 15, a size 11, and a size 15. Pass over the crystal and through the seed bead on the opposite side, plus the next bead so you're exiting on the outside edge seed bead.

## Step 5

Time for another all-seed bead right-angle weave unit! So pick up 3 seed beads, and pass back through the bead you originally exited, plus move forward through 2 of the new beads added so you're exiting the outside edge seed bead.

**Repeat Steps 2-5 until you have used all but ONE crystal!**

## Ending old thread and adding new thread

It's your choice whether you tie a few half-hitch knots along the way as you end off your thread, or if you simply weave back and forth through the beads for an inch or so as you end your old thread. You'll add new thread the same way.

For video help on tying half-hitch knots, you can find my demonstration here:

<https://youtu.be/TQ9IG9AYdYY>

## Attach the ends

When attaching the last crystal, finish Step 2 as usual, but on the other side of the crystal, you're going to join the ends. So making sure the ribbon of beads isn't twisted, lay the two ends next to each other.

Pick up 1 seed bead (yellow in diagram), and pass through the outside edge seed bead from the other end of the ribbon (red in diagram.) Then pick up one more seed bead (yellow) and pass back through the crystal.

As usual, reinforce this round if desired, then move forward so you're exiting the seed bead next to the crystal.

Do Step 4 one last time, and then end off your thread! You're done!

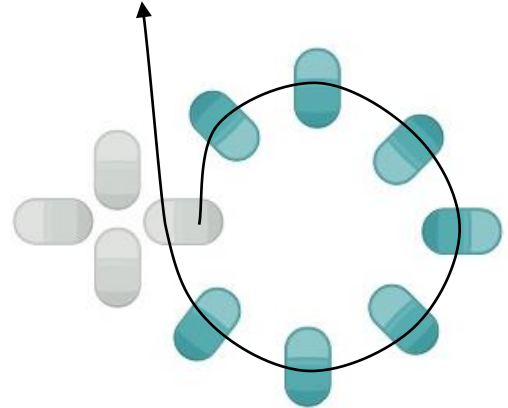

## Optional: Attach to Multi-Strand Clasp

To make the multi-strand version, you will need to attach the ends of the necklace to the clasp rings. Here's how:

Finish with one of the all-seed bead units. You'll notice then that both the hole in the last seed bead and the clasp ring are in the same direction – that means you'll need to use a jump ring to attach them so it will lay right. But don't worry! You can make your own seed bead jump ring!

First, with your thread exiting the last seed bead on the end, pick up 7 seed beads, and pass back through the bead you were originally exiting, creating a small loop at the end. Reinforce by passing back through the loop twice more, and then end off the thread.

Using an 8-10" piece of thread, pick up 9 seed beads, pass the needle through both the loop at the end of the necklace and the top loop of your clasp (don't forget this part!) and then from the tail end, pass back through all of them again. Then keep going around a few times! The whole way around! This is your jump ring!! To end off your working and your tail threads, tie a few knots as you go around.

If it's long enough, you can use your tail thread to create the loop at the opposite end. If not, you'll need to end that tail thread and then add a new thread to create the loop. Then make another jump ring to attach that end to the clasp also.

Repeat for each remaining necklace strand.

End off any remaining threads, and enjoy wearing your new necklace!

**Please Note:**

By purchasing this pattern, you agree to the following Jill Wiseman Designs conditions:

1. You may sell any work made from the pattern if you yourself hand-created the piece (in other words, no mass production). It would be nice if you credited the designer as well.
2. You may not use our projects and/or patterns to teach a class, with the exception of free YouTube projects, which you may teach. A list of free YouTube patterns which may be taught can be found at <http://shop.jillwisemandesigns.com/free-patterns/>.
