jewel SCHOOL

NEED

- 12 pearls
- 20g gold tone wire
- 22g gold tone wire
- Flush cutters

- Round nose pliers
- Flat nose pliers
- 6-step bale maker
- Chain nose pliers

- 1.5 mm 1-step looper
- 20g silver wire
- Wire rounder/ dremel

1 Get all your supplies together. Start with your flat nose pliers, 22g wire, and a seed bead.

2 Make a tiny bend in the end of your 6" 22g wire and squeeze to create headpin. Add seed bead.

**3** Add 6 pearls. 2mm away from last pearl, make bend w/ round nose pliers. Push wire back to create loop.

4 Grasp loop with flat nose pliers and use chain nose to wrap excess wire and coil above pearl.
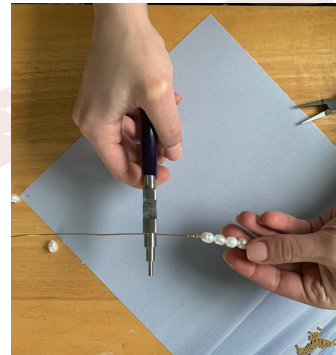

5 Snip extra with flush cutters then squeeze tight with chain nose.
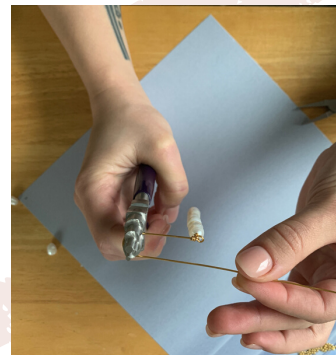

6 Cut 6" 20g wire. 1" from end, use round nose pliers to create loop. Attach to pearl headpin.
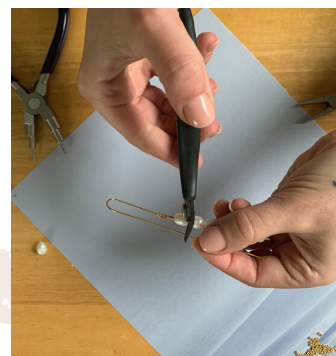

7 1" from the spot you just connected, use lg. part of 6-step bale maker to grip.

8 Curve wire over until back of wire is parallel with front.

9 Snip wire just above the start of the second pearl.

10 Using wire rounder/dremel in shallow dish of water, round off the end of the wire so it's ready to wear!
